

1 February 2017

IRPC reinforced the environmental watch during the major turnaround period.

Mr. Pongraphan Titathavewatana, Senior Executive Vice President of IRPC Public Company Limited (IRPC) revealed, "We reinforce the environmental watch during 1 month major turnaround maintenance from 2 February 2017 to 2 March 2017. The turnaround maintenance is planned after a period of normal operation to ensure the operational effectiveness and the safety."

The company put the importance on the social and environmental responsibility. We were well prepared for the emergency crisis situations. We invested in new technology to improve our production process as well as to reduce all effects on the environment and the communities. In addition, we reinforced the environmental watch, publishing a manual for safety, occupational health and environment during the turnaround operation in 2017. The manual indicated the instructions for operation process, basic safety, occupational health and environmental care. As such, the operators, the contractors and other relevant persons could strictly follow the instructions when working for the safety and health of their own and the others.

The company provided several contact channels: to inform us of the environmental effect, people could contact our emergency crisis control center at the telephone number 1800-800-008 or 038-802560 around the clock or contact our Environmental Management Section at the telephone number 038-611333 or 038-613571-80. Moreover, we disseminated the information to make people in the neighborhood understand and accept. It was important that local people and communities could get involved in the assessment or suggest any operational ideas to assure them of our safety, care and responsibility for the public.

Some machine parts were covered with the plastic fabrics to prevent dust and residue in the air during the maintenance.
